

## **Down Loading Mail List For PC Application Software**

### **Basic Concepts:**

1. **Diskette Size** - There are two options to choose from: A 3 1/2 regular floppy or a Zip100 disk. Keep in mind that a Zip disk will cost you more. You may also request your file via email.
2. **Diskette Density** - Density can either be "Standard" or "High Density" with High Density preferred.
3. **File Format** - In what format do you want your mail list down loaded? There are five possible formats to choose from: Borland Paradox, Dbase/Foxpro, Standard Ascii fixed length, Fixed length fields (CR,LF), Delimiter (ie. comma, tab, etc.)
